ELIAS HANTULA
SOFTWARE DEVELOPER/ATTORNEY/RELATIVITY CERTIFIED ADMINISTRATOR

Summary

Software Developer, New York barred Attorney and certified legal database administrator. I have worked with large companies and start-ups and developed full stack applications utilizing technologies including ReactJS, MongoDB, SQL and Redux. I am interested in leveraging my software skills and legal expertise in order to develop innovative and advanced software solutions.

Employment

Fronteo
New York, NY
E-Discovery Project Manager
Feb 2017 to Jun 2017

Managed document review platform including creating user accounts, modifying administrative rights, creating coding channels, developing workflows, integrating client parameters and generating production sets. Handled all aspects of data processing including ingestion, documentation, coordinating with stakeholders, and resolution of data exceptions. Created and conducted QC/QA on production sets prior to delivery. Developed and implemented best practices relating to data processing, and document review project management.

Pictoguard
New York, NY
Intellectual Property Enforcement Agent
Feb 2012 to Jun 2015

Monitored and enforced copyrights and publicity rights of models/celebrities through DMCA takedown procedures, international copyright takedown procedures, contract analysis, vigilant demand letters and coordination with ISPs. Trademark Registration. Analyzed material for potential copyright infringement. Successfully removed material from 1000+ websites.

Am Law 100 Firms
New York, NY
E-Discovery Spanish/Ukrainian/Russian language Attorney,
Mar 2011 to Jan 2017

Using Relativity, Ringtail, Omni/X, and Concordance, reviewed and translated Spanish, English, Russian and Ukrainian materials. Crafted privilege logs, advanced searches, drafted memorandum of findings. 1st and 2nd Level Review, QC, Team Lead.

Projects

Backpack
Jan 2018 to Current

Web App and Chrome extension which provides users with the ability to save their favorite media links and other links with thumbnail previews for storage and viewing from one location. The App utilizes Facebook, Google and local passport-oauth strategies, ReactJS, MongoDB, Redux and NPM packages such as Open-Graph. The project was implemented in a team using an Agile workflow. https://github.com/eliashantula/Pockets/tree/dev. Code was modularized and sensitive data was obfuscated in order to maintain data privacy.

Event Guider
Dec 2017 to Dec 2017

Web app which provides local events based on zip code using Yelp api and Eventful api data. App includes realtime chat ability using socket.IO. I implemented the project in one day.

Education

Viking Code School
Full Stack Software Engineering 2018
Accelerated training program. Built well-tested production web applications as part of rapid iteration team using Agile methodologies and modern technology stacks (JavaScript, MongoDB, SQL, ReactJS). Applications included a full-featured local events guide and single-page apps like a restaurant site and searchable user galleries.
